

Chapter 10 – Clinical Concepts

Use your textbook to read and summarize each of the disorders, conditions, or abnormalities. Some will be located in the text but should be noted with bold or italicized print. Many will be in the purple inset boxes from the text, which should make them easier to locate. Those not located in these sections should be found at the end of the chapter in the “related clinical terms” section.

1. diabetes insipidus
2. hyperglycemia
3. diabetes mellitus, type 1
4. diabetes mellitus, type 2
5. acromegaly
6. cretinism (*congenital hypothyroidism*)
7. goiter

Name _____ Period _____ Date _____

8. Addison disease
